

One Step Away from Nature

Dual-action Biofertilizer Plus technology transforms chicken manure into a robust liquid input that improves plant and soil health

with Benefits from Planting to Harvest

Better Soil, Stronger Plants, Reduced Stress

-  **Direct Impact on Soil Biodiversity**, including beneficial bacteria and active metabolic compounds to stimulate dynamic microbial and soil enzymatic activity
-  **Earlier Emergence & More Uniformity**, improving seeding vigor and uniformity of plant stands
-  **Enhanced Root Structures**, improving nutrient acquisition, plant resiliency and soil quality
-  **Improved Tolerance to Abiotic Stress**, including improved drought tolerance

“

"We started using EKL One five years ago as an in-furrow product. We have repeatedly seen visual results of enhanced root growth when compared to a 10-34-0 starter. In fact, we are so pleased with this product, that it has replaced all 10-34-0 in our crop program!"

for Superior Performance

Proven to Enhance Nutrient Use Efficiency and Availability

-  **Measurable Improvement in Nutrient Uptake**, improving Phosphorus, Sulfur, Calcium, Magnesium, and Iron acquisition
-  **Sustainable Starter Alternative**, improving soil and enhancing plant health for better crop yields

Stands Up to the Competition

EKL ONE directly impacts plant productivity and enhances soil health for superior results.

Start Your Crops Off Right

One Easy-to-Use Product

- **No Clogging** - Filtered through 250 mesh screens
- **Easy to use** with your current spray and drip equipment
- **Apply** pre-plant, starter, side dress, foliar or through fertigation
- **No Application Restrictions** pre-harvest or manure setback intervals

EKL ONE Stand Alone for Corn

Replicated independent corn foliar trial at 3 sites
Foliar application at V5-7 at manufacturer's recommended rate
(source: Ag Products Research, Inc. 2022)

EKL ONE Stand Alone on Soybeans

Replicated independent soybean foliar trial at 3 sites
Foliar application at manufacturer's recommended rate and timing

One Product You Can Use When You Need it Most

Crop	Starter — in furrow or 2x2	Foliar
Corn	5 gal/acre	5 gal/acre - V5-V7
Soy	5 gal/acre	5 gal/acre - V5-V7
Wheat & Cereals	5 gal/acre	5 gal/acre - Fekkes 3 to first frost or prior to flowering
