

One Step Away from Nature

Dual-action Biofertilizer Plus technology transforms chicken manure into a robust liquid input that improves plant and soil health

EKLne Biofertilizer Plus with Benefits from Planting to Harvest

Better Soil, Stronger Plants, Reduced Stress

-  **Earlier Emergence & More Uniformity**, improving seeding vigor and uniformity of plant stands
-  **Enhanced Root Structures**, improving nutrient acquisition, plant resiliency and soil quality
-  **Direct Impact on Soil Biodiversity**, including beneficial bacteria and active metabolic compounds to stimulate dynamic microbial and soil enzymatic activity
-  **Improved Tolerance to Abiotic Stress**, including improved drought tolerance

“

We started using EKL One five years ago as an in-furrow product. We have repeatedly seen visual results of enhanced root growth when compared to a 10-34-0 starter. In fact, we are so pleased with this product, that it has replaced all 10-34-0 in our crop program!

EKLne Biofertilizer Plus for Superior Performance

Proven to Enhance Nutrient Use Efficiency and Availability

-  **Measurable Improvement in Nutrient Uptake**, improving Phosphorus, Sulfur, Calcium, Magnesium, and Iron acquisition
-  **Sustainable Starter Alternative**, improving soil and enhancing plant health for better crop yields

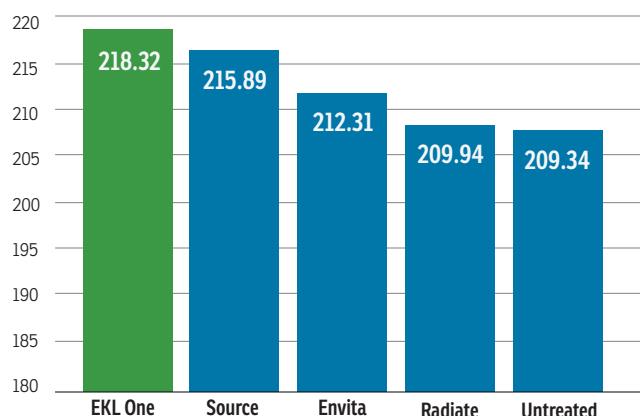

Stands Up to the Competition

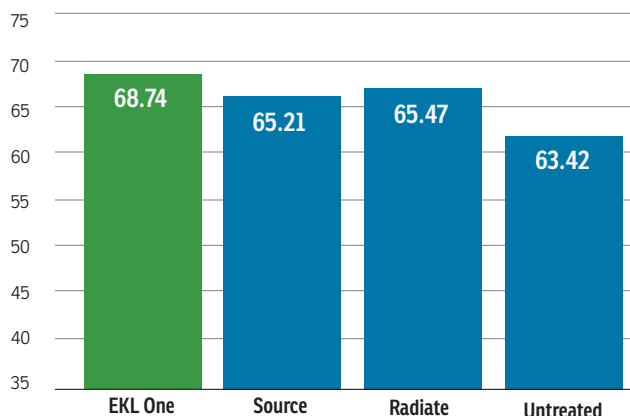

EKL ONE directly impacts plant productivity and enhances soil health for superior results.

EKL ONE Stand Alone for Corn

Replicated independent corn foliar trial at 3 sites
Foliar application at V5-7 at manufacturer's recommended rate
(source: KOVA)

EKL ONE Stand Alone on Soybeans

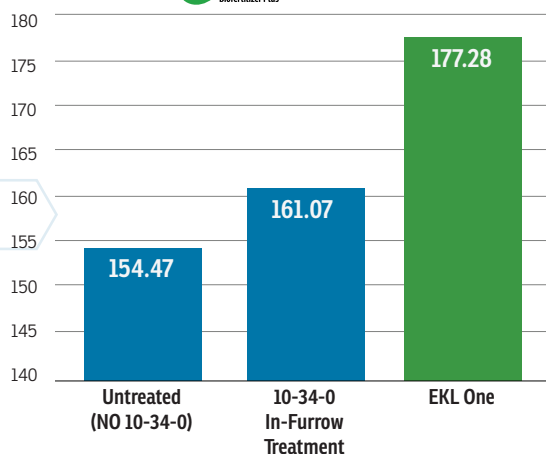

Replicated independent soybean foliar trial at 3 sites
Foliar application at V5-7 at manufacturer's recommended rate
(source: KOVA)

One Easy-to-Use Product

- **No Clogging** - Filtered through 250 Mesh Screens
- **Easy to use** with your current spray and drip equipment
- **Apply** pre-plant, starter, side dress, foliar or through fertigation
- **No Setback Restrictions**

Start Your Crops Off Right
